

# Seminar on Organic Electronics

ISPM RAS,  
Moscow, Profsoyuzyana 70  
February 2, 2011  
(Wednesday)

## Program

- 11.00 – 11.30 Dr. Sergei Ponomarenko (ISPM RAS) “Oligothiophene-based organosilicon materials for organic electronics and photonics”
- 11.30 – 12.00 Dr. Pavel Troshin (IPCP RAS) “Research activities in the field of organic bulk-heterojunction solar cells at IPCP RAS”
- 12.00 – 12.10 Coffee break
- 12.10 – 12.40 Prof. Sergei Chvalun (ISPM RAS) “Nanostructured polymeric and hybrid materials synthesized by VDP-process. Electronic and optoelectronic application”
- 12.40 – 13.00 Dr. Mikhail Yablokov (ISPM RAS) “Thin polymer films formation by plasma polymerization for optoelectronic applications”
- 13.00 – 13.30 Discussion

**Working language: English**
