Scientific Program

Scientific program of the ISPO-2013 will include following topics:

- Recent advances in the design of organosilicon polymers (silicon-containing dendrimers, hyperbranched polymers, brushes, etc)
- Interaction of silicon polymers with surfaces, superhydrophobicity and superoleophobicity
- Environmental concerns: recycling and reuse of organosilicon polymers, biocompatible silicones
- Preparation and properties of new materials based on organosilicon polymers and hybrid systems
- Towards new applications of organosilicon polymers

The Workshop Program will include plenary and invited lectures, oral contributions and poster presentations. The official workshop language is English.

Worldwide-recognized scientists from both academia and industry will give lectures at the workshop.

Following scientists confirmed their participation so far: Alan R. Bassindale, Michael A. Brook, Sergei N. Chvalun, Petar R. Dvornic, Yusuke Kawakami, Paul D. Lickiss, Martin Moeller, Aziz M.
